About the Book

For Bixby Alexander Tam (nicknamed Bat), life is pretty great. He’s the caretaker of the best baby skunk in the world — even Janie, his older sister, is warming up to Thor. But when Janie gets a part in the school play, it means some big changes. Someone else has to take care of the skunk kit in the afternoons and Bat has to go to a new place after school. Why can’t everything just stay the same? Bat can’t wait for Janie’s play to be over!

Acclaimed author Elana K. Arnold follows her popular first book A Boy Called Bat with the second book in this delightful series about a boy who loves animals, his family, and having a best friend but who struggles with everyday challenges. Bat’s autism makes learning facts easier than making friends. As famed animal scientist and autistic advocate Temple Grandin once put it, “Autism made school and social life hard, but made animals easy.”

Through the support of his parents, teacher, and best friend, Bat is learning to see the world through the eyes of others. The lessons along the way, punctuated by the charming pictures of Charles Santoso, are tender and true.

About the Author

Elana K. Arnold grew up in California, where she, like Bat, was lucky enough to have her own perfect pet — a gorgeous mare named Rainbow — and a family who let her read as many books as she wanted. She is the author of picture books, middle grade novels, and books for teens, including the National Book Award finalist What Girls Are Made Of. Elana lives in Huntington Beach, California, with her husband, two children, and a menagerie of animals. She calls the “Bat” series for Walden Pond Press “books of her heart.” You can find her online at www.elanakarnold.com.

In the year since A Boy Called Bat was published, I have had the great privilege of connecting with teachers, librarians, parents, and kids across the country. I’ve gotten letters from young readers asking if I have a pet skunk (sadly, no), emails from parents who want to know if I am connected to the autism community in my real life (gratefully, yes), and invitations to travel to schools to talk more about writing, reading, loving animals, and supporting kids of all kinds.

Writing a book can feel like a singular task, but what has moved me to tears is how sharing a love for a book is the opposite of that. The community of readers that has welcomed Bat into classrooms, libraries, book clubs, and homes is incredible to me.

Bat and the Waiting Game, the continuing story of Bixby Alexander Tam and the skunk kit named Thor, is in many ways the story of community. It’s a story of making room for one another. It’s about the different languages of love.

I am so glad to be part of the children’s literature community, and I’m endlessly grateful that Bat is part of it, too. I hope that Bat’s books can be part of discussions about empathy, loving kindness, and fluffy animal friends. I hope that kids see themselves, their siblings, their classmates, and their families reflected in the pages of these books. I hope that meeting Bat prompts readers to ask themselves about the motivations behind others’ actions and encourages them to be gentle with one another and with themselves.

As always, I want to thank the grown-ups who are doing the day-to-day real work of being present for our children in libraries and schools.

With Gratitude,

Elana K. Arnold
A Note to Educators:

Bat and the Waiting Game is the second book in the popular middle grade series by Elana K. Arnold about Bixby Alexander Tam (Bat for short), an autistic boy experiencing the ups and downs of school and family life with the added challenges and gifts of his neurodiversity. This latest installment in the story of the lovable Bat provides a valuable classroom resource for discussions of anti-bullying, diverse points of view, and strategies to overcome frustrations common to many students. In his efforts to succeed in daily life, Bat must practice patience and learn to manage his own expectations while navigating the twists and turns of best-friendship, classroom situations, and his role in his family.

Teachers encountering the awesome and complex responsibility of fulfilling the unique needs of every student are finding creative, compassionate ways to accommodate a broad range of learning styles. Many incorporate the principles of Universal Design for Learning (UDL). In addition, increased emphasis on social-emotional learning (SEL), through which students learn empathy and relationship building, has become an important teaching tool in many classrooms.

Bat and the Waiting Game supports these important components of the classroom experience by modeling empathy and inclusivity through an engaging story. Students will root for Bat throughout his adventures and misadventures with his skunk kit, his sometimes-cranky older sister, and his best friend, Israel. The suggested exercises in this Educators’ Resource build on the effective ways in which differing perspectives are sensitively depicted in the book.

NEW AND DIFFERENT

Bat’s reaction to visiting Israel’s house for the first time presents his response to having his senses overwhelmed. For Bat, even good sensory experiences can be hard to handle if he experiences too much at once. While discussing this activity with students, it may be helpful to point out that it’s not that each new taste, sight or sound makes him anxious — it’s the number of new experiences he’s having at the same time.

THE WAITING GAME

Like many children his age, Bat often feels caught in a waiting game: waiting to play with his skunk kit; waiting to be picked up from school or his father’s house; waiting to share big news with a best friend who’s late to school; waiting for his sister’s play rehearsals to be over; and waiting for the end of a seemingly endless baseball game. Discussion of the book’s title and the “waiting” theme offer a chance to work with students on practicing presence and understanding.

The touching scene at the end of the baseball game on page 88 quoted in the activity illustrates this point. Bat gains insight into what his father loves about taking him to a baseball game, and this helps him relax and enjoy himself.

POINTS OF VIEW: BAT AND JANIE

A book written in the third person limited point of view as this one offers readers the chance to examine the main character’s perspective, while still being able to see the situations he is in with a little bit of distance.

In the first example shown in this activity, readers can see Bat’s point of view clearly as he tenderly cares for Thor. In the second example, it’s evident that Bat does not consider Janie’s point of view when he makes the decision to bring Thor to Janie’s performance.
SOCIAL AND EMOTIONAL LEARNING

The importance of understanding multiple points of view, a dominant theme of this book, is the foundation of SEL and the basis for character education, classroom inclusion, and the development of emotional intelligence.

Here are some further examples from the story in which Bat demonstrates his emotional and social skills:

- **on page 36**, Bat scolds Mr. Grayson for scaring Babycakes;
- **on page 88**, he stops himself from correcting his dad;
- **on page 121**, he lets Israel carry his precious skunk Thor because “it is what a good friend would do;”
- **on pages 166-176**, Bat creates a secret project as an apology to his sister that requires him to undertake many tasks and reach out to many different people;
- **on page 170**, he allows Janie to look directly into his eyes even though he doesn’t enjoy it.

Here are some further examples from the story in which Israel demonstrates his emotional and social skills:

- **on page 94**, Israel reminds Bat to thank the principal for letting them use the copy machine;
- **on page 125**, Israel pretends to be Janie so he can explain her behavior to Bat;
- **on page 127**, Israel tells Bat he would be his friend even if he didn’t have a skunk kit.

FAVORITE THINGS

Bat’s feelings for the clay skunk that Israel makes for him and gives him early in the story help present Bat's emotional journey. Though he is not at first sure what the figure is, he quickly realizes it is important for him to respond kindly to Israel’s gift. And at the end of the story, he shows how much Israel’s gift means to him, and even begins to transfer some of the affection he feels for Thor to the little clay version of the kit. This activity can create an opening for a classroom discussion about gifts, friendship, and special/favorite objects.

New and Different

When Bat visits Israel’s house for the first time, he gets anxious because the tastes, sights, sounds, and smells of a new place are too much for him to take in all at once. Israel brings Bat to his mom’s pottery studio when he sees Bat is upset. Do you think this will make Bat feel better? Why or why not?

Have you ever gone somewhere new and different and felt overwhelmed? If so, describe what happened and how you reacted. Did you find a good way to get calm?
The Waiting Game

There are many times during the story when Bat has to wait and be patient instead of acting as he pleases. He has to wait until school gets over to play with Thor. He has to wait for Israel to get to school so he can tell him about his idea to work together on a project. He has to wait for Janie’s school play to take place so he can go back to spending afternoons with her at home.

During the course of the story, Bat learns a bit about waiting, being patient, and thinking about other people. One such time is while he is sitting next to his father at a baseball game, waiting for it to end. And it seems like it never will end.

But then Bat’s father explains his favorite thing about baseball.

“‘It’s this. This, right here. Sitting next to someone I love, having a snack and something to drink…Spending time together. Being with you.’

[Bat] looked out across the field, not trying to keep track of the players or the score. Instead he tried to melt a little, like the cotton candy, and just be happy to be right there at the game with his dad. (PAGE 88)

When Bat’s father explains what he loves about baseball games, Bat relaxes for the first time that evening. He no longer feels impatient. What does he learn?
Points of View: Bat and Janie

Maybe, Bat thought, there was something better in the world than cradling a sleepy, just-fed baby skunk in your arms. But at this moment, it didn’t seem likely. (PAGE 1)

The first sentence of the book tells you through whose eyes you will be experiencing this story. How do you know it is written from Bat’s point of view?

Janie’s point of view is shown when Bat makes the bad decision to bring Thor to her performance in a musical at school...and Thor escapes...AND sprays his skunk smell for the first time.

Chairs turned over as the audience rushed toward the exits. Bat, panicked, eyes stinging from the odor, dropped to the ground and felt around desperately for Thor.

Oh! What a mistake it had been to bring the kit!

Someone turned the lights on and Bat spied a black-and-white tail two rows up, sticking out from behind an overturned chair....

Bat blinked against the sudden light. He looked up. And there, on the stage, arms crossed, crown listing to one side, stood Janie. (PAGES 150-151)

Think about this situation from Janie’s point of view. Write a journal entry as if you were Janie, after having her big moment spoiled by Thor and by Bat’s bad decision to bring Thor to the play.
Social and Emotional Learning

Social and emotional learning skills aren’t graded in school. These skills include being patient, sticking to something until it is done, communicating clearly, finding a common interest with someone, listening well, and giving good feedback. Learning to use these skills can help someone be a good friend or family member.

Bat shows that he has these skills throughout the book. Here is one example:

With his thumb, Bat gently stroked the white strip of fur that ran up Thor’s snout and over his head. Thor closed his shiny black eyes and it looked to Bat like he grinned, short milky whisker hairs curving upward. (PAGES 17-18)

Bat learns to put aside some of his own wishes in order to be a better friend and kinder family member. What are some other scenes where Bat shows his social and emotional skills? Describe and discuss.

Each important person in Bat’s life uses social and emotional skills to respond to him at one point or another in this story. Here is an example of Bat’s mom using her social and emotional skills:

Mom came around to his front and held out her arms. She knew that Bat sometimes didn’t feel like being touched when he was upset, and this was her way of letting him know that she was there if he wanted a hug. (PAGE 23)

How does Bat’s mom show her skills in this scene?
Social and Emotional Learning continued

Here is an example of Israel using his social and emotional skills:

Bat wondered if new, different mistakes would be better than the mistakes he had made — taking Thor to the play, ruining Janie’s big night, and not knowing how to be a better friend to Israel, maybe not being his friend anymore at all.

“Do you want some company?”
Bat looked up. It was Israel.
“I have company,” Bat said, petting Babycakes.

“Oh,” said Bat. “Yes. Actually, I would like your company.”
This made Israel smile. He climbed into the enclosure and sat down next to Bat.” (PAGES 161-162)

How does Israel show his skills in this scene?

**Favorite Things**

At the beginning of the book, Israel gives Bat a clay sculpture of Thor. At first, it takes Bat a moment to realize that is what it is. And then…

Bat had rubbed his thumb down the smooth shiny back of the clay lump…a warm good feeling spread through his chest and up his neck. (Page 5)

Why is this little lumpy clay skunk so special to Bat?

At the end of the book, Bat pulls the clay skunk out of his pocket to show Israel that he has it with him.

“Hey!” Israel whispered. “You’re carrying it! That’s so cool!” Bat grinned and rubbed his fingers along the clay lump, memorizing the way the words “From Israel” felt against his thumb. (Page 173)

Use three or four descriptive words to explain how Israel feels when he realizes Bat is carrying the clay skunk.

Then we learn:

Thor wasn’t with him, but Bat felt a sweet warmth in his chest, almost as if the skunk kit was cuddled there. (Page 173)

What does that description tell you about some ways Bat changes during the course of this story?

Write about, draw, or photograph an object special to you. Explain why it is special.
